

Protecting tomorrow's discoveries today with Dimensions Research Security

Manage compliance and reduce risk through comprehensive research security analysis

With today's rapid pace of new discoveries, and huge volume of scientific production, research has become a new theater of information warfare. As a government agency success relies on being able to thoroughly evaluate potential funding risks, conduct comprehensive due diligence, and ensure full compliance with all regulations and mandates.

Dimensions Research Security enables you to efficiently analyze risks, verify disclosures, and review potential collaborations - protecting your organization's reputation and safeguarding your research investments.

“Dimensions is a valuable tool for us. I was easily able to identify foreign collaborations that I was unaware of within the first two days of use”

Associate Director for Science and Security

Data that makes the difference

+140 million publication

Full-text indexing for over
70% of publications

+30 million datasets

+7 million grants

+820 thousand
clinical trials

+160 million patents

+1.9 million policy
documents

Security matters.
Securely enrich your
data with Dimensions.

Streamline your analyses by combining Dimensions' extensive global data with your organization's internal data in one secure platform.

Four ways to enhance research security and safeguard your investments with Dimensions

Dimensions is uniquely designed to support extensive research security efforts within government research organizations, enabling you to:

Identify potential data risks in international research partnerships

Analyze international collaborations, uncover dual affiliations, examine cited research to identify potential intellectual property risks, and pinpoint undisclosed foreign funding sources that could introduce research security breaches.

Verify complete researcher disclosures efficiently

Access unified publication, grant, patent, and clinical trial data all in one place. Thoroughly validate researcher disclosures of activities, funding sources, affiliations, potential conflicts of interest and verification tasks in record time. Ensure full compliance with certification requirements.

Conduct thorough due diligence

Quickly review publication histories, affiliation details, acknowledged funders, and more to vet potential collaborators, research staff, and grantees on sensitive projects. Uncover any undisclosed collaborations or foreign funding sources that could introduce risks to your organization's research initiatives.

Demonstrate robust compliance protocols to stakeholders

Maintain audit trails documenting your comprehensive due diligence processes. Track intellectual property of your researchers and collaborators to further validate your compliance efforts to leadership, stakeholders, and oversight bodies.

Let's hear about you.

Your organization's needs are unique, so we take a personal approach to helping you. Our expert team will consult and work with you to make sure you get the very best from Dimensions.
