

Smarter Compliance for Global Literature Review

This Top 10 Med Device company partnered with Digital Science to unify its regulatory literature workflows across business units. By deploying ReadCube, the company moved from fragmented tools to a centralized platform, reducing cost, improving review speed, and laying a foundation for automation.

The Opportunity

The company's global regulatory teams managed literature reviews using disconnected tools, like Excel, shared drives, email, and offline storage. This created version control issues, duplication of purchases, and slowed compliance documentation.

The company needed to simplify this complexity and reduce effort, while ensuring global visibility and audit readiness.

They saw the opportunity to consolidate fragmented processes into one intelligent platform, helping teams move faster and reduce compliance risk.

The Solution

ReadCube provided unified literature monitoring for global regulatory teams.

- ✓ Automated alerts and tagging reduced manual screening time
- ✓ Shared libraries and permissions improved collaboration and traceability
- ✓ Centralized content eliminated redundant purchases and reconciliations
- ✓ Piloting AI summaries accelerated preparation of regulatory deliverables

The Results:

50%

fewer steps
for faster audit-ready
documentation
